SUBJECT INDEX

VOLUME 10 (1970)

Achromatic lesions, X-ray-induced, in *V. faba*, 159
Acridine mustard, in *S. cerevisiae*, 11
Acridine orange, mitotice gene conversion in *S. cerevisiae*, 509
Agrobacterium tumefaciens, mutant M39, some characteristic properties, 651
—, —, comments on a previous publication, 653
Amino acid starvation, nitrosoguanidine-induced, in *S. cerevisiae*, 73
Antranol, genetic effect, 533
Arabidopsis thaliana, action of *N*-methyl- and *N*-ethyl-*N*-nitrosourea, 169
—, influence of pH on mutagenic effectiveness of nitroso compounds, 43
Aspergillus nidulans, nitrous acid mutations, 111
—, reverse mutation at the XDH loci, 175
—, spontaneous recombination in mutants of, 33
—, survival of mutants after UV, 21
Auger effect, killing and mutagenic action in *E. coli* associated with, during ^{125}I decay, 247

Bacillus subtilis, action of *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine on DNA, 85
—, solubilization of DNA, after UV, 7
Barley, aberrations induced by X-rays and chemicals, 185
—, effect of ^{90}Sr, 335
—, nitrogen mustard in, 165
—, *N*-nitroso-*N*-methylurethane, 119
—, nuclear DNA complement in young proembryos, 515
Basfungin, genetic effect, 533
Bean, mutagenic effect of cycasin, 251
—, seed, X-ray irradiation, 449
Benlate, genetic effect, 533
Benomyl, genetic effect, 533
5-Bromodeoxyuridine, sex-linked lethal mutations in spermatogenous cells of *D. melanogaster*, 591

Caffeine, inhibitor of photoenzymatic repair of UV lesions in *E. coli* DNA, 319
—, posttreatment, UV sensitivity of HeLa cells, 67
Capsular polysaccharide, protection against UV in *E. coli* by, 153
Captan, genetic effect, 533
Chinese hamster, cells, mammalian, cultured, mutation after UV and X irradiation, 141
—, lymphocytes, effect of methyl methanesulphonate, 645
Chinomethionat, genetic effect, 533
Chinosol, genetic effect, 533
Chlamydomonas reinhardi, γ radiation and α particles, 545
—, dose dependence for radiation-induced allelic recombination, 557
Chromosome, X, deletions in *D. melanogaster*, 61
—, —, loss induced by X-rays in oocytes of *D. melanogaster*, 583
—, —, ring, recessive lethals in *D. melanogaster*, 53
—, Y, of *D. melanogaster*, ethyl methanesulphonate-induced mutants, 597
—, —, site of function in *D. melanogaster*, 503
Cignolin, genetic effect, 533
Colchicine, achromatic lesions in *V. faba*, 159
Conference report, repair and mutation in microorganisms, 168
Cycasin, in beans, 251

Diazepam, in human blood lymphocytes, 635
Dichlofluanid, genetic effect, 533
Diepoxybutane, aberrations in barley, 185
—, interaction with UV in yeast, 525
—, mutation at XDH loci in *A. nidulans*, 175
Diethyl-2-chloroethylamine hydrochloride, in barley, 165
Diethyl sulphate, mutation at XDH loci of *A. nidulans*, 175
—, in Sorghum, 77, 197
1,8-Dihydroxyanthranole, genetic effect, 533
N,N'-Dimethyl-*N*-nitrosourea, influence of pH, in *A. thaliana*, 43
Dimethylsulphoxide, "on the tertiary structure of chromosomes", 405
Dithane-Ultra, genetic effect, 533
DNA, analysis of photoenzymatic repair of UV lesions in *E. coli* by single light flashes, 277, 319
—, analysis of photoenzymatic repair of UV lesions in *H. influenzae* by single light flashes, 291, 307
—, complement, nuclear, in young proembryos of barley, 515
—, repair, and chromatid anomalies, in mammalian cells exposed to 4-nitroquinoline 1-oxide, 389
—, solubilization, in *B. subtilis* after UV, 7
—, synthesis, unscheduled, at low X-ray dose in human lymphocytes, 379
—, transforming, of *B. subtilis*, action of *N*-methyl-*N'*-nitro-*N*-nitosoguanidine, 85

Dodin, genetic effect, 533
Drosophila melanogaster, analysis of the *dumpy* region, 489
—, 5-bromodeoxyuridine-induced sex-linked lethal mutations in spermatogenous cells, 591
—, cytogenetic study of radiation damage in entire genomes, 207
—, deletions in X chromosome, 61
—, differential radiosensitivity of early cleavage stages, 567
—, ethyl methanesulphonate-induced mutants in Y chromosome, 597
—, genetics of a mutator gene, 353
—, induction by X-rays of isochromosomes in germ cells, 475
—, male, ethyl methanesulphonate, 227
—, —, ethyl metanesulphonate and γ-rays, 221
—, nondisjunction by X-rays in oocytes, 125
—, recessive lethals in ring X chromosome, 53
—, resistance of mature oocytes to X-rays, 156
—, sensitive or resistant to X irradiation, 463
—, site of Y chromosome function, 503
—, X chromosome loss induced by X-rays in oocytes, 583
Durum wheat, embryo–endosperm relations in irradiated water-soaked seeds of durum wheat, 253

Embryo, lung cell, human, effect of *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 237
Embryo–endosperm relations, in irradiated water-soaked seeds of durum wheat, 253
Escherichia coli, analysis of photoenzymatic repair of UV lesions in DNA by single light flashes, 277, 319
—, effects of LSD-25, 269
—, K12, radiation sensitivity in threonine auxotroph, 103
—, —, studies on threonine auxotroph, 91
—, killing and mutagenic action associated with Auger effect during ^{125}I decay, 247
—, protection against UV by capsular polysaccharide, 153
—, UV mutagenesis, 521
Ethyl alcohol, in *V. faba*, 162
Ethyl methanesulphonate, in *D. melanogaster* males, 221, 227
—, mutants in the Y chromosome of *D. melanogaster*, 597
—, recessive lethals in ring X chromosome of *D. melanogaster*, 53
—, in Sorghum, 77, 197
—, sublethal dose in hybrid male mice, 365
—, in Y chromosome of *D. melanogaster*, 503
N-Ethyl-*N'*-nitro-*N*-nitrosoguanidine, influence of pH, in *A. thaliana*, 43
N-Ethyl-*N*-nitrosourea, influence of pH, in *A. thaliana*, 43
—, reaction rates and biological action, 169
Ethylvinylnitrosamine, influence of pH, in *A. thaliana*, 43
Euparen, genetic effect, 533

Folpet, genetic effect, 533
Fuclasin-Ultra, genetic effect, 533
Fungicides, genetic effects, 533

Gene, *uvr*, of *S. typhimurium*, mapping, 506
Gene conversion, nitrosoguanidine-induced, in *S. cereviviae*, 73
Gene recombination, effect of γ radiation and α particles in *Chl. reinhardi*, 545
Genomes, entire, cytogenetic study of radiation damage in *D. melanogaster*, 207
Germ cells, of *D. melanogaster*, induction of isochromosomes by X-rays, 475
Glycerol, "on the tertiary structure of chromosomes", 405
Guinea-pig, male, X irradiation, 133

Haemophilus influenzae, analysis of photoenzymatic repair of UV lesions in DNA by single light flashes, 291, 307
Hamster, male, X irradiation, 133
HeLa cells, caffeine posttreatment effect on UV sensitivity, 67
Hordeum distichum, nuclear DNA complement in young proembryos, 515
Hordeum vulgare, aberrrations induced by X-rays and chemicals, 185
—, nitrogen mustard in, 165
Host cell reactivation, influence of, on pure and mixed clones of c mutants in phage kappa, 257
Human, embryonic lung cell, effect of *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 237
—, lymphocytes, chromosomal radiosensitivity, 617
—, —, effect of methyl methanesulphonate, 645
—, —, "on the tertiary structure of chromosomes", 405
—, —, treated with diazepam, 635
—, —, unscheduled DNA synthesis at low X-ray doses, 379
—, mammalian cells, exposed to 4-nitroquinoline 1-oxide, 389
—, peripheral lymphocytes, aberrations induced by X-ray therapy and myxovirus infection in, 607
Hydrazine, breaks in *V. faba* chromosomes, 519
Hydrogen-3, decay, killing and mutagenic action in *E. coli* associated with Auger effect during, 247
8-Hydroxyquinoline sulphate, and K_2SO_4, genetic effect, 533

ICR-170, analysis of *dumpy* region in *D. melanogaster*, 489
—, in *S. cerevisiae*, 11
Iodine-125, decay, killing and mutagenic action in *E. coli* associated with Auger effect during, 247
Irradiation, α particles, in *Chl. reinhardi*, 545
—, γ, chromosomal sensitivity in human blood lymphocytes, 617
—, —, in *D. melanogaster*, males, 221
—, —, dose dependence for allelic recombination in *Chl. reinhardi*, 557
—, —, in *E. coli*, 247

—, —, repeated small doses, in mouse spermatogonia, 497
—, —, in Sorghum, 77
—, ^{60}Co γ, in *Chl. reinhardi*, 545
—, UV, caffeine posttreatment effect on sensitivity of HeLa cells, 67
—, —, in DNA of *E. coli* cells, analysis of photoenzymatic repair by single light flashes, 277, 319
—, —, in DNA of *H. influenzae* cells, analysis of photoenzymatic repair by single light flashes, 291, 307
—, —, in *E. coli*, 521
—, —, of *E. coli*, protection by capsular polysaccharide, 153
—, —, influence of, on pure and mixed clones of c mutants in phage kappa, 257
—, —, interaction with diepoxybutane in yeast, 525
—, —, in mammalian human and Syrian hamster cells, 389
—, —, sensitive mutants of *S. coelicolor*, 427, 439
—, —, sensitivity of wild-type and UVS mutants of *S. pombe*, 415
—, —, solubilization of DNA in *B. subtilis* after, 7
—, —, survival of mutants of *A. nidulans*, 21
—, —, and visible light, sensitivity of *S. typhimurium rec* mutants, 1
—, UV and γ, in threonine auxotroph of *E. coli*, 103
—, X, aberrations in barley, 185
—, —, achromatic lesions induced in *V. faba*, 159
—, —, cytogenetic study in entire genomes of *D. melanogaster*, 207
—, —, deletions in X chromosome of *D. melanogaster*, 61
—, —, differential sensitivity of early cleavage stages in *D. melanogaster*, 567
—, —, induction of isochromosomes in germ cells of *D. melanogaster*, 475
—, —, at low doses, unscheduled DNA synthesis in human lymphocytes, 379
—, —, in male guinea-pigs, hamsters, rabbits and mice, 133
—, —, in oocytes of *D. melanogaster*, 125
—, —, recessive lethals in ring X chromosome of *D. melanogaster*, 53
—, —, resistance of mature oocytes of *D. melanogaster* to, 156
—, —, sensitive and resistant *D. melanogaster*, 463
—, —, "on the tertiary structure of chromosomes", 405
—, —, as therapy, aberrations in human peripheral leucocytes, 607
—, —, in *V. faba*, 449
—, —, in water-soaked seeds of durum wheat, embryo–endosperm relations, 253
—, —, X chromosome loss in oocytes of *D. melanogaster*, 583
—, X and γ, in Sorghum, 197
—, X and UV, of cultured mammalian cells, 141
Isochromosomes, induced by X-rays in *D. melanogaster* germ cells, 475

Leucocytes, human peripheral, aberrations induced by X-ray therapy and myxovirus infection in, 607
Light, single flashes, analysis of photoenzymatic repair of UV lesions in DNA of *E. coli* by, 277, 319
—, —, analysis of photoenzymatic repair of UV lesions in DNA of *H. influenzae* by, 291, 307
LSD-25, effects in *E. coli*, 269
Lung, cell, embryonic, human, effect of *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 237
Lymphocytes, human, blood, chromosomal radiosensitivity, 617
—, —, —, treated with diazepam, 635
—, —, "on the tertiary structure of chromosomes", 405
—, —, unscheduled DNA synthesis at low X-ray doses, 379
—, mammalian, effect of methyl methanesulphonate, 645
Lysergic acid diethylamide, in *E. coli*, 269

Maleic hydrazide, in *V. faba*, 162
Mammalian cells, human and Syrian hamster, exposed to 4-nitroquinoline 1-oxide, 389
Mancozeb, genetic effect, 533
Maneb, genetic effect, 533
Maneb-Spritzpulver (maneb wettable powder), genetic effect, 533
Measles virus, aberrations induced in irradiated human peripheral lymphocytes, 607
Melprex, genetic effect, 533
Methylazoxymethanol-β-D-glucoside, in beans, 251
Methylbenzylnitrosamine, influence of pH, in *A. thaliana*, 43
Methyl methanesulphonate, effect on mammalian cells, 645
—, in Sorghum, 77, 197
—, sublethal dose in hybrid male mice, 365
Methylmetiram, genetic effect, 533
Metiram, genetic effect, 533
N-Methyl-*N'*-nitro-*N*-nitrosoguanidine, in human embryonic lung cell, 237
—, influence of pH, in *A. thaliana*, 43
—, mutation at XDH loci of *A. nidulans*, 175
—, in *S. cerevisiae*, 11
—, transforming DNA of *B. subtilis*, 85
N-Methyl-*N*-nitroso-*p*-toluenesulphonamide, influence of pH, in *A. thaliana*, 43
N-Methyl-*N*-nitrosourea, influence of pH, in *A. thaliana*, 43
—, reaction rates and biological action, 169
Microorganisms, repair and mutation, conference report, 168
Mitotic gene conversion, acridine-induced, in *S. cerevisiae*, 509
Mitotic recombination, spontaneous, in mutants of *A. nidulans*, 33
Morestan, genetic effect, 533
Mouse, ethyl and methyl methanesulphonate at sublethal dose in hybrids, 365

—, male, X irradiation, 133
—, spermatogonia, repeated small γ-ray radiation doses, 497
Mumps virus, aberrations induced in irradiated human peripheral lymphocytes, 607
Mutagen, acridine mustard, in *S. cerevisiae*, 11
—, acridine orange, mitotic gene conversion in *S. cerevisiae*, 509
—, β-propiolactone, in *S. cerevisiae*, 11
—, 5-bromodeoxyuridine, sex-linked lethal mutations in spermatogenous cells of *D. melanogaster*, 591
—, caffeine, inhibitor of photoenzymatic repair of UV lesions in *E. coli* DNA, 319
—, —, posttreatment, UV sensitivity of HeLa cells, 67
—, colchicine, achromatic lesions in *V. faba*, 159
—, cycasin, in beans, 251
—, diazepam, in human blood lymphocytes, 635
—, diepoxybutane, aberrations in barley, 185
—, —, interaction with UV in yeast, 525
—, —, mutation at XDH loci in *A. nidulans*, 175
—, diethyl-2-chloroethylamine hydrochloride, in barley, 165
—, diethyl sulphate, mutation at XDH loci of *A. nidulans*, 175
—, —, in Sorghum, 77, 197
—, *N,N'*-dimethyl-*N*-nitrosourea, influence of pH, in *A. thaliana*, 43
—, dimethylsulphoxide, "on the tertiary structure of chromosomes", 405
—, ethyl alcohol, in *V. faba*, 162
—, ethyl methanesulphonate, in *D. melanogaster* males, 221, 227
—, —, mutants in the Y chromosome of *D. melanogaster*, 597
—, —, recessive lethals in ring X chromosome of *D. melanogaster*, 53
—, —, in Sorghum, 77, 197
—, —, sublethal dose in hybrid male mice, 365
—, —, in Y chromosome of *D. melanogaster*, 503
—, *N*-ethyl-*N'*-nitro-*N*-nitrosoguanidine, influence of pH, in *A. thaliana*, 43
—, *N*-ethyl-*N*-nitrosourea, influence of pH, in *A. thaliana*, 43
—, —, reaction rates and biological action, 169
—, ethylvinylnitrosamine, influence of pH, in *A. thaliana*, 43
—, glycerol, "on the tertiary structure of chromosomes", 405
—, hydrazine, breaks in *V. faba* chromosomes, 519
—, ICR-170, analysis of *dumpy* region in *D. melanogaster*, 489
—, —, in *S. cerevisiae*, 11
—, LSD-25, effects in *E. coli*, 269
—, maleic hydrazide, in *V. faba*, 162
—, methylazoxymethanol-β-D-glucoside, in beans, 251
—, methylbenzylnitrosamine, influence of pH, in *A. thaliana*, 43
—, methyl methanesulphonate, effect on mammalian cells, 645
—, —, in Sorghum, 77, 197
—, —, sublethal dose in hybrid male mice, 365
—, *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, in human embryonic lung cell, 237
—, —, influence of pH, in *A. thaliana*, 43
—, —, mutation at XDH loci in *A. nidulans*, 175
—, —, in *S. cerevisiae*, 11
—, —, transforming DNA of *B. subtilis*, 85
—, *N*-methyl-*N*-nitroso-*p*-toluenesulphonamide, influence of pH, in *A. thaliana*, 43
—, *N*-methyl-*N*-nitrosourea, influence of pH, in *A. thaliana*, 43
—, —, reaction rates and biological action, 169
—, nitrogen mustard, in barley, 165, 185
—, 4-nitroquinoline 1-oxide, in mammalian cells, 389
—, *N*-nitrosoethylurea, in Sorghum, 77, 197
—, nitrosoguanidine, gene conversion and amino acid starvation in *S. cerevisiae*, 73
—, —, in *S. coelicolor*, 427
—, *N*-nitrosomethylurea, analysis of *dumpy* region in *D. melanogaster*, 489
—, —, in Sorghum, 77
—, *N*-nitroso-*N*-methylurethane, in barley, 119
—, nitrous acid, in *A. nidulans*, 111
—, —, influence of pH, in *A. thaliana*, 43
—, —, mutation at XDH loci of *A. nidulans*, 175
—, —, in *S. cerevisiae*, 11
—, proflavine, mitotic gene conversion in *S. cerevisiae*, 509
—, *N,N',N'*-trimethyl-*N*-nitrosourea, influence of pH, in *A. thaliana*, 43
—, urea, "on the tertiary structure of chromosomes", 405
Mutant, c, in phage kappa, host cell reactivation and UV dose in formation of pure and mixed clones, 257
—, M39, of *Agrobacterium tumefaciens*, some characteristic properties, 651
—, —, —, comments on a previous publication, 653
—, *rec*, of *S. typhimurium*, sensitivity to UV and visible light, 1
—, UVS, of *S. pombe*, sensitivity to UV irradiation, 415
—, *uvsB* and *uvsC*, of *A. nidulans*, spontaneous mitotic recombination, 33
—, —, —, survival after UV, 21
Mutation frequencies, tables determining statistical significance of, remark on, 256
Myxovirus infection, aberrations induced by, in irradiated human peripheral lymphocytes, 607

Newcastle disease virus, aberrations induced in irradiated human peripheral lymphocytes, 607
Nitrogen mustard, aberrations in barley, 185
—, in barley, 165
4-Nitroquinoline 1-oxide, in mammalian cells, 389
Nitroso compounds, influence of pH on mutagenic effectiveness, in *A. thaliana*, 43

N-Nitrosoethylurea, in Sorghum, 77, 197
Nitrosoguanidine, gene conversion and amino acid starvation in *S. cerevisiae*, 73
—, in *S. coelicolor*, 427
N-Nitrosomethylurea, analysis of *dumpy* region in *D. melanogaster*, 489
—, in Sorghum, 77
N-Nitroso-*N*-methylurethane, in barley, 119
Nitrous acid, in *A. nidulans*, 111
—, influence of pH, in *A. thaliana*, 43
—, mutation at the XDH loci of *A. nidulans*, 175
—, in *S. cerevisiae*, 11
Nondisjunction, induced by X-rays, resistance of mature oocytes of *D. melanogaster* to, 156
Nuclear selection, evidence of, in embryogenesis, X-ray irradiation in male *D. melanogaster*, 475

Oocytes, of *D. melanogaster*, mature, resistance to X-rays, 156
—, —, stage-7, population RÖ I, decreased sensitivity to X-rays, 463
—, —, X chromosome loss induced by X irradiation, 583
—, —, X-ray-induced nondisjunction, 125
Orthocid, genetic effect, 533
Ortho-Phaltan, genetic effect, 533
Oryza sativa, induced variability in protein content, 81

Paramutation, acridine-induced, in *S. cerevisiae*, 509
pH, influence of, on mutagenic effectiveness of nitroso compounds in *A. thaliana*, 43
Phage kappa, host cell reactivation and UV dose in formation of pure and mixed clones of c mutants in, 257
Phaseolus vulgaris L., mutagenic effect of cycasin, 251
Photoenzymatic repair, of UV lesions in DNA of *E. coli* cells, analysis by single light flashes, 277, 319
—, of UV lesions in DNA of *H. influenzae* cells, analysis by single light flashes, 291, 307
Polyram-Combi, genetic effect, 533
Proembryos, of barley, nuclear DNA complement in, 515
Proflavine, mitotic gene conversion in *S. cerevisiae*, 509
Propineb, genetic effect, 533
β-Propiolactone, in *S. cerevisiae*, 11
Protein content, induced variability, in *Oryza sativa*, 81

Rabbit, lymphocytes, effect of methyl methanesulphonate, 645
—, male, X irradiation, 133
Radioactivity, killing and mutagenic action in *E. coli* associated with Auger effect during ^{125}I decay, 247
Recombinationless mutants, of *S. typhimurium*, sensitivity to UV and visible light, 1
Region, *dumpy*, in *D. melanogaster*, genetic analysis, 489

Saccharomyces cerevisiae, acridine-induced mitotic gene conversion, 509
—, acridine mustard in, 11
—, genetic effects of fungicides, 533
—, interaction of diepoxybutane and UV, 525
—, nitrosoguanidine in, 73
Salmonella typhimurium, mapping of *uvr* gene, 506
—, sensitivity of *rec* mutants to UV and visible light, 1
Schizosaccharomyces pombe, UV sensitivity of wild-type and UVS mutants, 415
Seed, *V. faba*, X-ray irradiation, 449
Sendai virus, aberrations induced in irradiated human peripheral lymphocytes, 607
Solubilization, of DNA in *B. subtilis* after UV, 7
Sorghum durra, mutations in, 77
—, physical and chemical mutagens, 197
Sorghum subglabrascens, mutations in, 77
—, physical and chemical mutagens, 197
Sorghum vulgare, systematic mutations, 77
Spermatogenous cells, of *D. melanogaster*, sex-linked lethal mutations induced by 5-bromodeoxyuridine, 591
Spermatogonia, mouse, repeated small γ-ray radiation doses, 497
Statistical significance, of mutation frequencies, tables for determining, remark on, 256
Streptomyces coelicolor, UV-sensitive mutants, 427, 439
Strontium-90, in barley, 335
Syrian hamster, mammalian cells, exposed to 4-nitroquinoline 1-oxide, 389

Tables, for determining statistical significance of mutation frequencies, remark on, 256
"Tertiary" structure, of chromosomes, 405
Threonine auxotroph, radiation sensitivity studies, in *E. coli*, 103
—, studies, in *E. coli*, 91
N,N',N'-Trimethyl-*N*-nitrosourea, influence of pH, in *A. thaliana*, 43

Urea, "on the tertiary structure of chromosomes", 405
UV–microscopical studies, on X-ray-induced achromatic lesions in *V. faba*, 159

Vicia faba, ethyl alcohol and maleic hydrazide in, 162
—, hydrazine-induced breaks, 519
—, X-ray-induced achromatic lesions, 159
—, X-ray irradiation, 449

Wheat, durum, embryo–endosperm relations in irradiated water-soaked seeds of, 253

XDH loci, reverse mutation at, in *A. nidulans*, 175

Yeast, genetic effects of fungicides, 533
—, interaction of diepoxybutane and UV, 525

Ziram, genetic effect, 533
